# Software Developer

## About Me:

Hi, my name is Karol Janowski. In 2022, I transitioned from a career in tax law to Java backend development. I joined the Zajavka project — one of the most comprehensive Java courses on the Polish market — to build solid foundations in software engineering. I'm passionate about backend development, working in the terminal, and automating tasks with Python and Bash. Currently seeking my first role as a Java software engineer, where I can grow and contribute to real-world projects. In my free time, I windsurf and foil in Rewa, or chill with my cat 🐱.
